

## **SEEmotions!**

This mobile app will allow young adults to monitor their heartbeat in three different stages, the first one will be while they are waiting in line, the second one during the ride and finally, the third one while they are descending from the roller coaster.

Discover how your heart feels about your courage!

This app will record the whole experience and will reduce it into a lapse of 3 min in case the waiting line lasts for hours!

With SEEmotions you will have the opportunity to learn too, what's your normal pulse, your maximum heart rate and to difference in an electrocardiogram which are the highest pulses you've got and in which of all the three stages of the coaster happened.
